#### Dance technique classes

While we provide some dance technique training in the Music Theatre program, the main focus is on providing opportunities for students to learn music theatre choreography and repertoire and combine this with their singing and acting skills. For this reason, students are expected to take a separate jazz technique class within the week - see Development & Syllabus Timetables for the available classes.

We have included the Inter/Senior Tap and Jazz technique classes in this timetable for those that are doing this as a stand alone program. Those doing jazz technique class/es at other times in the week do not need to attend these classes.
